

JINGZHANG BEACON

Making the Operating Status of an AI City a Public Signal Language

Centennial Jing-Zhang AI Innovation Belt Open Call · Formal Package (AI agent generated)

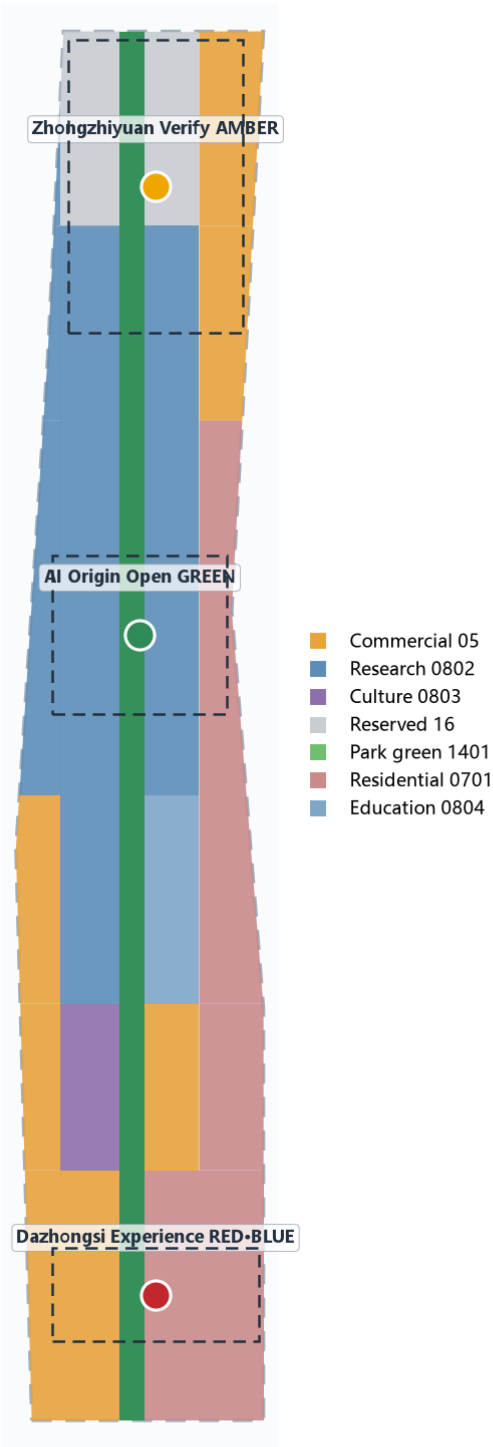

Green = experienceable (stable open) | Amber = controlled testing (time-limited pilot) | Red = retired & rolled back (exit mechanism)

One spine (signal green belt) · Three beacons (verify/open/experience) · Two wings (Zhongguancun service / Xiaoyue River scenarios)

All spatial layouts and activities are open co-creation concept suggestions; they do not replace statutory planning or constitute government-approved conclusions.

JINGZHANG BEACON: Overall Concept

One spine (signal green belt) · Three beacons (verify/open/experience) · Two wings · Three-colour signal language

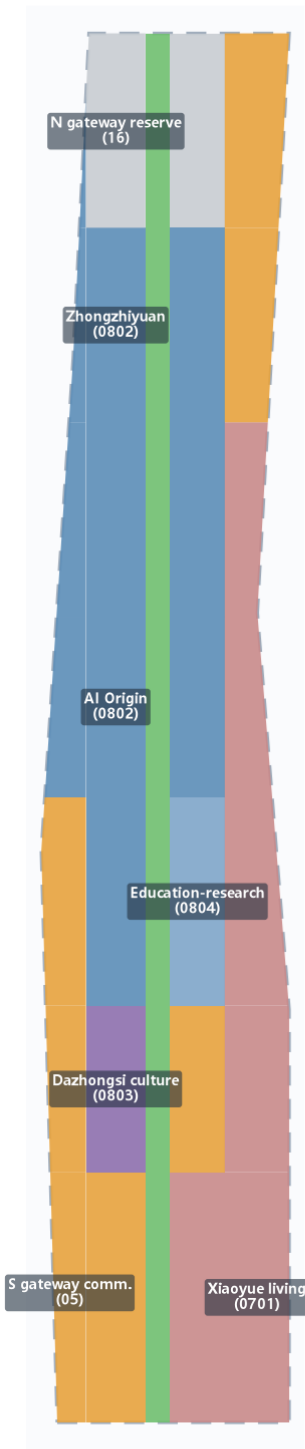

Boundary is provisional, discussion only [source:BOUNDARY-SOURCE]

Fig.1 Overall concept: one spine, three beacons, two wings, three-colour signal language (provisional boundary)

Conceptual Land-Use Structure and Three-Level Transmission

Conceptual Land-Use Structure and Three-Level Transmission

Land-use partition fully covers the provisional boundary (no gaps or overlaps) · National spatial classification

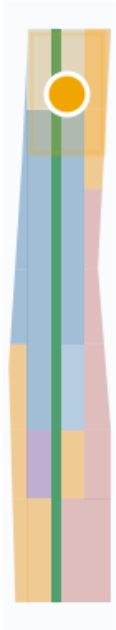

Conceptual parcels; not current or statutory land use [standard:MNR-LAND-USE-CLASSIFICATION-GUIDE]

Fig.2 Land use follows the national spatial classification, fully covering the provisional boundary (no gaps or overlaps)

Three Beacons: Key Detailed-Design Areas

Three Beacons: Verification (Amber) / Open Source (Green) / Experience (Red-Blue)

Verification Beacon AMBER

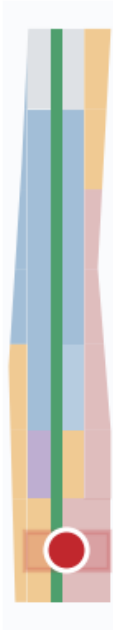

the front - verification axis - research units
virtual eval -> lab -> street pilot
[data:geometry/key_areas.geojson#PROV-KEY-001]

AI Origin Open-Source Beacon GREEN

Campus-adjacent open-source community: stitching axis - plaza - living
Open first, then commercialise: knowledge into the commons
[data:geometry/key_areas.geojson#PROV-KEY-002]

Dazhongsi Experience Beacon

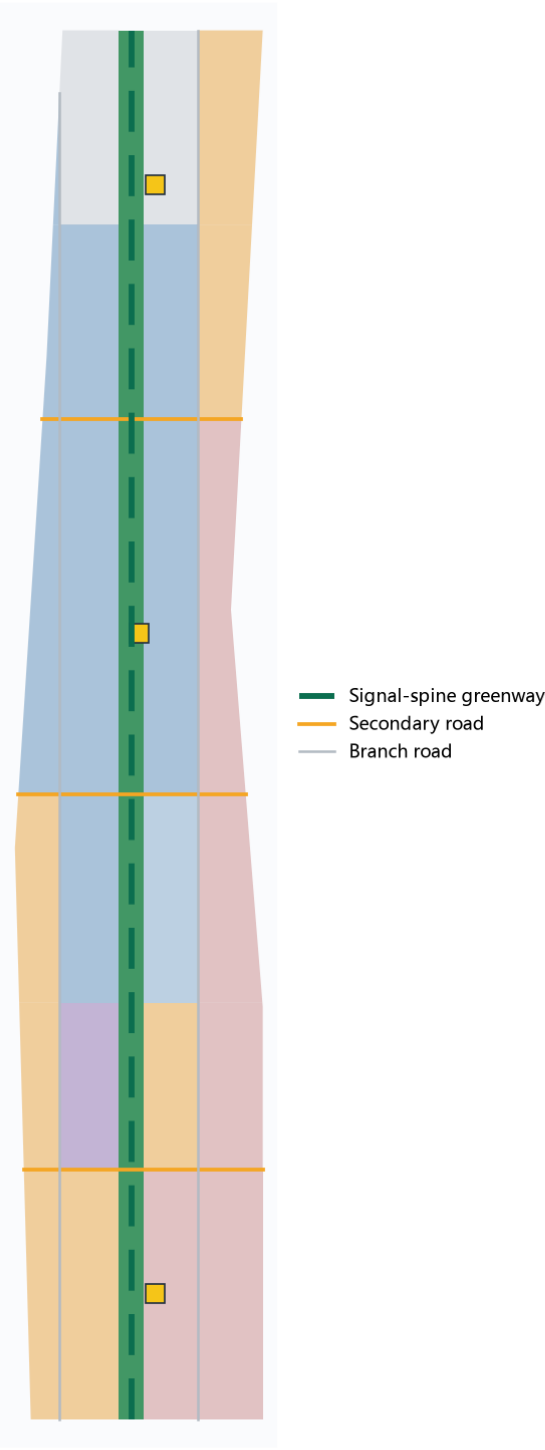

Native intelligent experience: station 4-qu
Selectable, exitable, human review
[data:geometry/key_areas.geojson#PROV-KEY-003]

Fig.3 Zhongzhiyuan verification (amber) · AI Origin open source (green) · Dazhongsi experience (red-blue)

Mobility, Slow Traffic and Blue-Green Public Space Composite System

Mobility, Slow Traffic and Blue-Green Public Space Composite System

Signal-spine greenway (north-south) · Secondary roads · Branches · Three beacon plazas and gateway wedges

Roads are a directional concept network, not redlines [depth:traffic_rail_slow_parking]

Fig.4 Signal-spine greenway north-south; secondary roads and branches form micro-circulation; three beacon plazas anchor the public front

Core Metrics and AI Scenario System

Core Metric Recalculation and Three-Colour Signal Evidence Chain

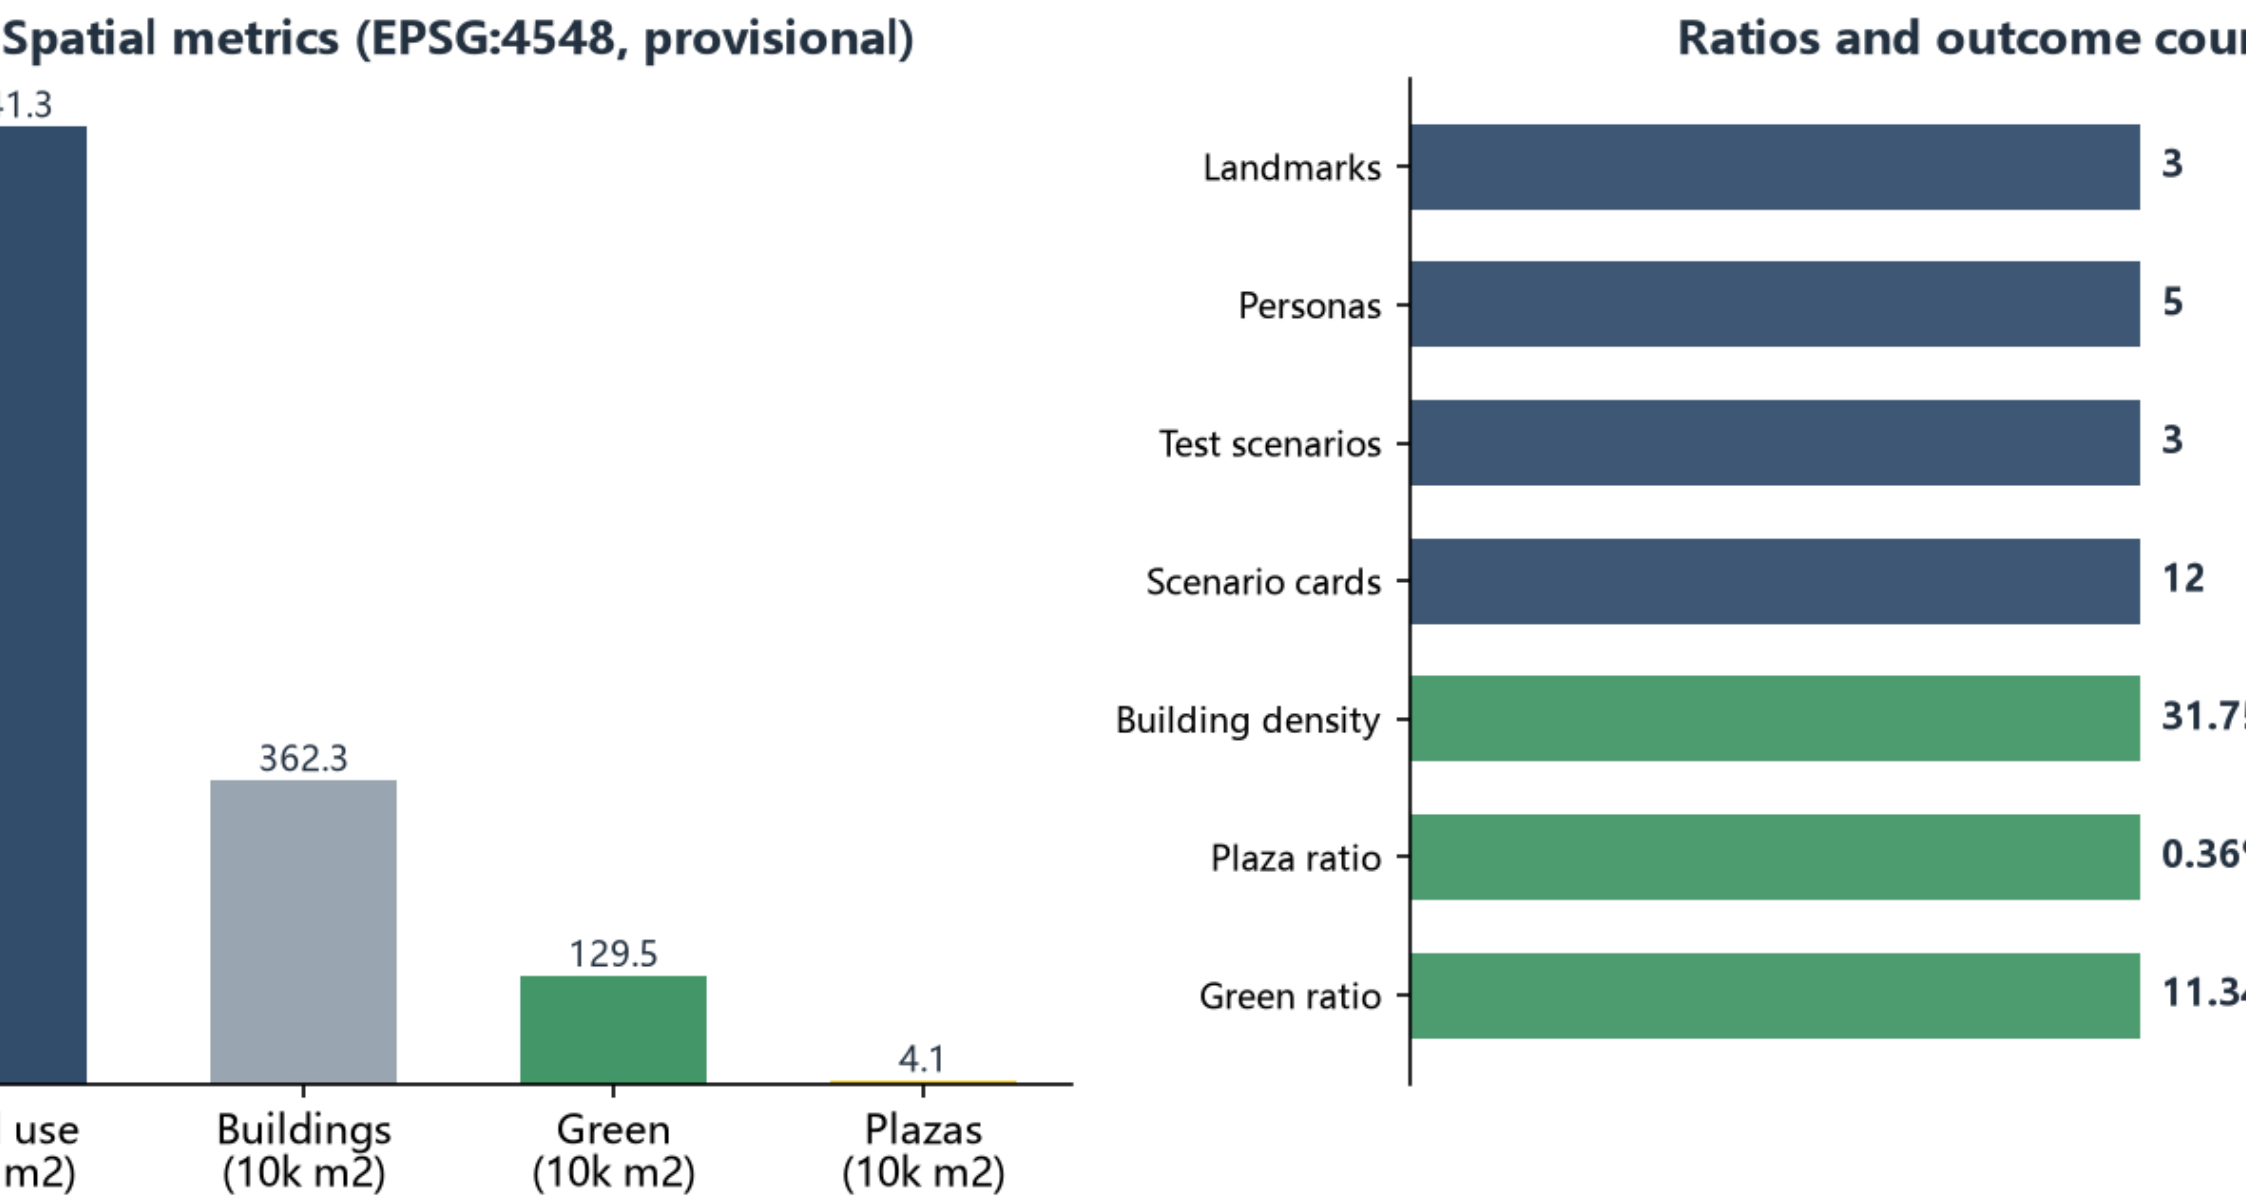

Fig.5 Metric recalculation and evidence chain (EPSG:4548, provisional boundary)

12 AI scenario cards (concept), 3 of which are industry test/validation scenarios; 5 persona types; 3 AI pilgrimage landmarks.

No.	Scenario card	Signal
SC-01	Open-source release hall (AI Origin)	Green
SC-02	Model evaluation & red-team sandbox (Zhongzhiyuan)	Amber-test
SC-03	Edge compute depot (signal spine)	Green
SC-04	AI slow-traffic navigation (greenway)	Green
SC-05	Dazhongsi international pitch lounge	Green
SC-06	Qinghe low-carbon innovation corridor (Zhongzhiyuan)	Amber
SC-07	Campus-adjacent translation street (AI Origin)	Green
SC-08	Data-element meeting lounge (Dazhongsi)	Amber
SC-09	AI living-service model street	Green
SC-10	Global AI Week route	Green
SC-11	Full-stack model controlled trial (Zhongzhiyuan)	Amber-test
SC-12	City-agent public audit desk (Zhongzhiyuan)	Amber/Red-test

Renewal Projects, Phasing and Risk Notes

No.	Project	Phase
JZ-01	Signal-spine slow-traffic gap stitching	Near
JZ-02	Zhongzhiyuan Qinghe low-carbon innovation front	Near
JZ-03	Origin campus-adjacent translation street	Near
JZ-04	Dazhongsi station four-quadrant walking continuity	Mid
JZ-05	Three beacon plazas implementation	Mid
JZ-06	AI public service and edge compute nodes	Mid
JZ-07	Global AI Week public route	Long

Risks and data gaps: official boundary/key-area polygons missing (does not block content scoring); regulatory indicators, road redlines, ownership, municipal capacity and heritage controls await official attachments.

Boundary: all geometry in this booklet is provisional_constraint; not for official redlines, approvals or precise-area bases; full recalculation after official polygons.

Compliance: compliance_matrix.json covers announcement 1.3/1.4/1.5 and agent.1-agent.6; standard_matrix.json covers all mandatory standards; design_depth_matrix.json all complete.

Copyright: source and licence status in sources.json and report/copyright_statement.md; this proposal claims no official approval or implementation commitment.
